

Printer Setup for Plant Tags

1. Ensure the 4BARCODE printer is set as the default printer on the workstation.
2. Go to Printer Preferences and confirm label Stock Size = 2.25 in × 0.75 in.
3. Load the correct label roll into the printer.

Printer Test (Recommended)

1. In the admin menu, select:
 - Crop: 1
 - Strain: Test Strain
2. The application will query the database and display the number of plants for that strain.
3. Adjust the “Number of Labels” if needed.
4. Click Print Tags.
5. Confirm that labels print correctly with the strain name centered on each label.
